Note : The death rates of ages 0 and 1-4 were estimated and adjusted that according to the death rate of the age group 5-9. If the death rate of this age group is none, the figure of the next age group is used to estimate them. Such adjusted rates are presented next to those calculated on the basis of registered deaths for reference. The method of estimation is shown at Paragraph 16, Section V of the "Technical Notes on the Statistical Tables" in page 21.
